Biozek medical is a Netherlands based manufacturer with wide ranges of IVD products, as a biotechnology company that specializes in research & development, manufacturing and distribution of the medical diagnostics and innovative immunodiagnostic tools and point-of-care diagnostic test kits for the IVD community worldwide, thanks to all the support from our valued customers worldwide.

We evolve into the global leader of IVD products, and our main products like HAV, Dengue, HIV and Syphilis, are recognized as world class products.

Customer service is an equally important factor to our business. We bring innovative solutions including convergence of rapid test with the power of modern electronics, thereby helping creation of new technological platforms as well as business processes that unlock the true potential of amalgamation of technology and commerce with new milestones in techno-commercial areas of POCT industry.

Management philosophy is to provide satisfaction to our customers and deal with customers as partners.

Biozek medical is known as a solution provider company.

Vitamin D rapid test

Total 25-hydroxy vitamin D

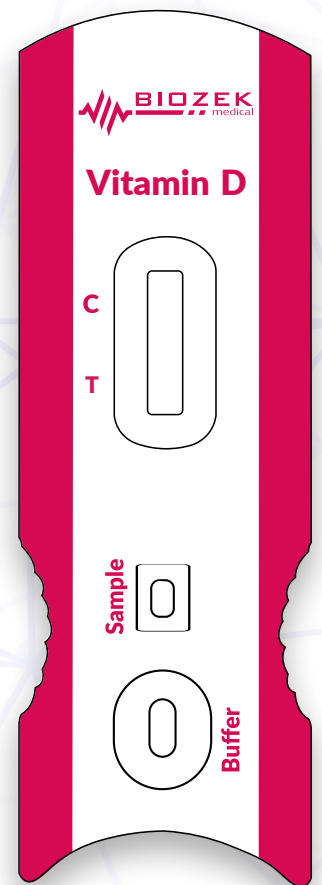

Vitamin D deficiency has become a worldwide problem in the elderly and remains common in children and adults.

Vitamin D deficiency can result in:

- Impaired bone mineralization and bone damage
- Higher risk of developing Alzheimer's disease
- Increased risk of viral infections, including HIV and influenza

Biozek test advantages:

- Semi quantitative results
- Chromatographic immunoassay technique
- High specificity and sensitivity
- Fast and reliable test results

We can improve the quality of life

Rapid Tests

Rapid tests are designed for use where a preliminary screening test result is required and are especially useful in resource-limited countries;

- High quality, easy-to-use tests for use in resource poor settings.
- Tests based on agglutination, immuno-dot, immuno-chromatographic and/or immuno-filtration techniques.
- Quick and easy to perform – 3 minutes to 30 minutes – and require little or no additional equipment.
- Are designed for use with individual or a limited number of samples, which make them more economical than ELISAs in low throughput laboratories.
- Possibility to store at room temperature for extended period of time.
- Same-day results provide timely treatment interventions.
